Natural Gas Generator Program Offered

Generator Supercenter of Oklahoma is offering a whole-home backup generator program for Oklahoma Natural Gas customers. The program includes a maintenance program and a free 7-year warranty. The warranty is valued at \$695.

The program is available to all residential Oklahoma Natural Gas customers.

Oklahoma weather can be harsh and unpredictable throughout the year, and a natural gas backup generator can serve as a backup when other power sources fail. If your power goes out, the generator automatically starts to work, using a direct connection to your natural gas service.

Storm Season Is Here: What to Do Before and After Severe Weather

- If your meter has been damaged or you smell natural gas, usually described as a pungent, “rotten egg” odor, leave the area immediately, then call **911** and Oklahoma Natural Gas at **800-458-4251**.
- If your natural gas meter was turned off or your service was interrupted during the storm, call our customer service at **800-644-5463** to have your service restored. To keep you and your home safe, do not attempt to turn your natural gas meter back on. Only a licensed service technician may safely perform this task.

If you are concerned about the condition of piping or appliances within your home, please call a licensed professional (e.g., plumber) for an inspection. Avoid damage before a storm by removing any objects that could be blown into or against your meter by strong winds, rain or flooding.

Investing in Our Communities

One of our Core Values is Service, and we believe in giving back through volunteerism. As part of Earth Day and National Volunteer Week in April, our employees came together for volunteer projects designed to better our planet and our local communities. In Tulsa, our employee volunteers helped plant 20 trees through local nonprofit Up With Trees.
