A Better Tomorrow for Your Community

We are dedicated to building a better tomorrow, and that includes the communities where we live and work. We just released our 2023 Foundation Impact Report, which measures our progress in making a difference across our service territory. Last year, our parent company invested nearly \$2.5 million in grants to nonprofit organizations across Kansas, Oklahoma and Texas through the ONE Gas Foundation. This included public school funding, matching employee grants and United Way donations. The giving didn't stop there! Employees volunteered over 6,000 hours across our operating areas supporting several local nonprofits.

Community Spotlights

We partnered with the **Oklahoma Center for Nonprofits** to support funding of its new headquarters in Oklahoma City. The organization helps improve the quality of life for Oklahomans by helping equip and strengthen the nonprofit sector through training, consulting, advocacy, membership, networking and awards. The facility will mainly be used for nonprofit members and administrative spaces.

In Tulsa, we worked with the **American Red Cross** to fund disaster recovery efforts for the June 2023 windstorm that heavily impacted the area. The fund covered unexpected costs resulting from the storm and aided affected residents, particularly low-income, elderly, disabled and other special needs populations.

5 Tips to Stay Cool and Save Money This Summer

- Run dryers, dishwashers and other large appliances at night.
- Seal doors and windows to keep cool air in and warm air out.
- Check all vents to ensure they're open and dust-free.
- Switch to a low-flow showerhead and install a faucet aerator to reduce water and energy usage.
- Save energy and money by upgrading to high-efficiency natural gas appliances.

Claim Your Free Water-Saving Kit

Make the Most of Summer Savings and Get Yours Today While Supplies Last!

Low-flow showerheads can save the average family up to 2,700 gallons of water per year. Plus, you can save up to \$140* in natural gas costs. This **free** kit is limited to one eligible residential customer account per calendar year and will be distributed on a first-come, first-served basis while supplies last.

**Approximate bill savings over 10-year life of the water kit. Based on average 2023 Oklahoma water and natural gas costs.*

Kids Home for the Summer? Let's Talk Natural Gas Safety!

Your kids are out of school for the summer and spending more time around the house. With additional time spent with family, this is a great time to talk about natural gas safety.

Here are some tips you can share with them:

- When an adult is cooking on a stove, the flame should be blue, not orange. If you see it is orange, tell the adult immediately.
- While natural gas appliances can look cool, they're not toys. Don't play with knobs, switches or any part of the appliance.
- Natural gas smells like rotten eggs. This helps detect if there's a leak. If you smell natural gas, leave the area immediately, tell an adult and contact **911**, then Oklahoma Natural Gas at **800-458-4251**.
- You probably have a meter outside that delivers natural gas into your home. It looks like a gray box with dials and pipes leading out of it. Do not play around the meter or place items on top of it.
- Did you know natural gas travels underground through pipes? Playing in the dirt can be fun, but it's important to dig safely to avoid damaging these pipelines underground. If an adult is about to dig, they should contact 811 at least 48 hours, excluding the date of notification, weekends and holidays, before starting.
